Nuclear Engineering and Design

Contents of Volume 146

Selected papers from the Fifth International Topical Meeting on Nuclear Reactor Thermal-Hydraulics, September 21–24, 1992, Salt Lake City, Utah, USA

Preface, *M. Ishii, V.H. Ransom and T.G. Theofanous* ix

General Thermal Hydraulics

Universal treatment of plumes and stresses for pressurized thermal shock evaluations, *T.G. Theofanous, S. Angelini and H. Yan* 1

Flow visualization study of post-critical heat flux in inverted flow, *I. Babelli, S.T. Revankar and M. Ishii* 15

An application of a higher order finite difference method to a natural convection experiment in the hot plenum of an LMFBR, *O. Watanabe, Y. Motomiya, H. Takeda and T. Koga* 25

Impedance based flow reconstruction – A novel flow composition measuring technique for multi-phase-flows, *F. Klug and F. Mayinger* 35

Turbulent bubbly two-phase flow data in a triangular duct, *M. Lopez de Bertodano, R.T. Lahey, Jr. and O.C. Jones* 43

Sensitivity analysis of bubble size and probe geometry on the measurements of interfacial area concentration in gas–liquid two-phase flow, *I. Kataoka, M. Ishii and A. Serizawa* 53

Measurements of turbulent velocity and temperature in axial flow through a heated rod bundle, *L. Meyer* 71

Fuel–Coolant Interactions

Multiphase transients in the premixing of steam explosions, *S. Angelini, E. Takara, W.W. Yuen and T.G. Theofanous* 83

Experiments on the mixing of molten uranium dioxide with water and initial comparisons with CHYMES code calculations, *M.K. Denham, A.P. Tyler and D.F. Fletcher* 97

Fragmentation mechanisms based on single drop steam explosion experiments using flash X-ray radiography, *G. Ciccarelli and D.L. Frost* 109

On the fundamental microinteractions that support the propagation of steam explosions, *W.W. Yuen, X. Chen and T.G. Theofanous* 133

A crystallization theory of underwater aluminum ignition, *M. Epstein and H.K. Fauske* 147

Numerical computation of underwater explosions due to fuel–coolant interactions, *D.L. Frost, J.H.S. Lee and P. Thibault* 165

Generation of destructive forces during fuel/coolant interactions under severe reactivity initiated accident conditions, *T. Fuketa and T. Fujishiro* 181
Molten aluminum alloy fuel fragmentation experiments, *J.D. Gabor, R.T. Purviance, J.C. Cassulo and B.W. Spencer* 195

Multidimensional and CCFL Effects
A general theory for flooding implementing cuspoids catastrophe, *A.Y. Lafi and J.N. Reyes, Jr.* 207
Hyperbolicity breaking and flooding, *J.Y. Lee and H.C. No* 225

Natural Circulation and / or Convection
Thermo-hydraulics during start-up in natural circulation boiling water reactors, *J.-H. Chiang, M. Aritomi, R. Inoue and M. Mori* 241
Two-phase flow natural circulation characteristics inside BWR vessels, *N. Abe, S. Yokobori, H. Nagasaka and S. Tsunoyama* 253
Natural convection between a vertical cylinder and a surrounding array, *D.M. McEligot, J.E. O'Brien, C.M. Stoots, T.K. Larson, W.A. Christenson, D.C. Mecham and W.G. Lussie* 267

Instability Mechanisms and Nonlinear Dynamics
Nonlinear effects in two-phase flow dynamics, *M. Pinheiro Rosa and M.Z. Podowski* 277

Advanced Reactor Thermal Hydraulics
Issues affecting advanced passive light-water reactor safety analysis, *R.J. Beelman, C.D. Fletcher and S.M. Modro* 289
Cooling performance of helium-gas/water coolers in HENDEL, *Y. Inagaki, S. Takada, H. Hayashi, T. Kobayashi, Y. Ohta, H. Shimomura and Y. Miyamoto* 301
Assessment of a heat transfer correlations package for water-cooled plasma-facing components in fusion reactors, *S.T. Yin, A. Cardella, A.H. Abdelmessih, Z. Jin and B.P. Bromley* 311
MHD effects on liquid metal film flow, *C. Liao, M.S. Kazimi and B. LaBombard* 325
Modeling supersonic flows through a gas-continuous two-fluid medium, *J.C. Liu, P. Colella, P.F. Peterson and V.E. Schrock* 337
Solid breeder thermal transient under purge-line-break accidents, *A.Y. Ying and M.A. Abdou* 349
Experimental study on scale effect on gas entrainment at free surface, *Y. Eguchi and N. Tanaka* 363
Gas entrainment in the IHX vessel of top-entry loop-type LMFBR, *Y. Eguchi, K. Yamamoto, T. Funada, N. Tanaka, S. Moriya, K. Tanimoto, K. Ogura, T. Suzuki and I. Maekawa* 373
Large scale experiments with a 5 MW sodium/air heat exchanger for decay heat removal, *H. Stehle, G. Damm and W. Jansing* 383
Mixed convective flow penetration in vertical channels, *D.W. Jerng and N.E. Todreas* 391

Containment Thermal Hydraulics
Passive heat removal experiments for an advanced HTR-module reactor pressure vessel and cavity design, *L. Wolf, A. Kneer, R. Schulz, A. Giannikos and W. Häfner* 409
Multi-compartment hydrogen deflagration experiments and model development, *T.F. Kanzleiter and K.O. Fischer* 417

Severe Accident Modelling

A model for the effect of Inconel grid spacers on progression of damage in reactor core, *L.J. Siefken and M.V. Olsen* 427

Transient Analysis and Simulation

Coupled 3-D kinetics thermal-hydraulic analysis of Hot Zero Power main steam line breaks using RETRAN and STAR codes, *M.A. Feltus* 439

Microgravity Thermal Hydraulics

Boiling two-phase flow under microgravity, *M. Saito, N. Yamaoka, K. Miyazaki, M. Kinoshita and Y. Abe* 451

Computational and Mathematical Modelling

Some computational challenges of developing efficient parallel algorithms for data-dependent computations in thermal-hydraulics supercomputer applications, *S.B. Woodruff* 463

A network method for homogeneous, thermally expandable two-phase flow on unstructured triangular grids, *T.A. Porsching and C.A. Hall* 473
